

Banco Cooperativo Espanol, S.A.

Key Rating Drivers

Important Role Within Group: Banco Cooperativo Espanol, S.A.'s (BCE) ratings reflect its low-margin, but stable and low-risk, business model focused on providing treasury and other services for credit cooperatives in Asociacion Espanola de Cajas Rurales (AECR). The bank's healthy asset quality and solid funding profile are rating strengths.

Part of Institutional Protection Scheme: BCE is a member of the Institutional Protection Scheme (IPS) of the Spanish rural credit cooperative association (AECR). In Fitch Ratings' view, this support mechanism enhances the cohesion of its members, but not sufficiently to equalise the default risk of group members and assign a group rating. As the mutual support mechanism matures, this could result in increased cohesion that may eventually result in a group rating being assigned.

Business Focused on Credit Cooperatives: BCE's market footprint is weak, but its business model benefits from being the central treasurer of AECR's members, which translates into recurring income from its members. We view BCE's role as necessary for the adequate performance of the group, especially for smaller cooperatives, by helping them to improve their operating efficiency and to access larger corporate customers.

Low-Risk Appetite: BCE's balance sheet is mainly composed of its large securities portfolio and ECB deposits funded by interbank placements from AECR members. The securities portfolio is dominated by Spanish sovereign bonds, which result in a sizeable concentration – at 25% of assets at end-2023. Operational losses have been limited, and the bank has effective internal control systems in place.

Strong Asset Quality: Our asset-quality assessment mainly reflects non-loan assets because the bank's loan book represented only about 10% of assets at end-2023. It mostly comprises exposures to good-quality corporates, which result in a low impaired loan ratio of only 0.3% at end-2023 and largely negligible credit losses. The securities portfolio is of high credit quality, dominated by investment-grade issuers.

Modest but Stable Profitability: Profitability has generally been stable over the cycle and is highly dependent on net interest income (NII), which in turn depends directly on business volumes from AECR members. Cost efficiency is satisfactory and supported by adequate control of expenses. We expect BCE's profitability to slightly improve in 2024 and 2025, supported by higher business volumes and good cost control.

Solid Capitalisation: BCE's robust common equity Tier 1 (CET1) ratio of 37.2% at end-2023 benefitted from low risk-weight densities given the high share of capital-light assets. Risk-weighted assets (RWAs) represented only 14% of assets at end-2023. We expect capital ratios to remain strong on earnings retention.

Stable Funding and Liquidity: BCE is mainly funded by deposits placed by AECR members, and, to a lesser extent, by other customer deposits and repos. The bank's funding lacks diversification compared with larger domestic peers', and access to capital markets remains untested. However, this is not a rating weakness given the bank's low loans/deposit ratio and ample liquidity.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

BCE's ratings could be downgraded if its importance within the AECR group diminishes, or if the size of the group decreases materially, as this could reduce business volumes and cast uncertainty on BCE's role in the Spanish cooperative sector. However, we view this unlikely given the presence of a cross-support mechanism.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

In the long term, continued strong relationships with AECR banks, supporting internal capital generation and strengthening the equity base, combined with an improvement of the aggregate business and financial profile of AECR member banks, could support an upgrade.

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

VR - Adjustments to Key Rating Drivers

The operating environment score of 'bbb+' is below the 'a' category implied score due to the following adjustment reason: economic performance (negative).

The business profile score of 'bbb' is above the 'b' category implied score due to the following adjustment reason: group benefits and risks (positive).

The asset quality score of 'bbb+' is below the 'a' category implied score due to the following adjustment reason: concentrations (negative).

The capitalisation & leverage score of 'bbb' is below the 'a' category implied score due to the following adjustment reason: risk profile and business model (negative).

Company Summary and Key Qualitative Factors

Business Profile

Central Treasurer for AECR Members

BCE's main role is serving AECR member credit cooperatives by offering central treasurer services, channelling liquidity to and from the AECR banks, and helping members to achieve economies of scale and operating efficiency. Part of BCE's balance sheet relates to activities conducted on behalf of AECR members, and it is regulated by a treasury agreement under which AECR banks guarantee any failure arising from BCE's interbank placements undertaken on their behalf. BCE also acts as a representative body for AECR members, and offers ancillary services, including IT services, insurance products and training services. BCE also offers a range of wholesale banking services to other institutions and corporations, but this is limited.

The AECR consisted of 30 members at end-2023, making up about EUR92 billion total assets, with similar business models and common cooperative values. The credit cooperatives generally have sound retail franchises in their home regions, particularly in rural areas of Spain. BCE is owned by the credit cooperatives through a holding company and by the DZ BANK AG Deutsche Zentral-Genossenschaftsbank (12%; AA-/Stable), the central institution of the German cooperative banking group.

BCE's business model means operating income mainly arises from the management of its liquidity, invested in fixed-income debt or a small loan book focused on Spanish corporates. This translates into NII being the main source of income (60% of operating income in 2023). This is complemented with fees and commissions (17%) from the ancillary services provided to AECR banks, and dividends from its main subsidiaries (10%).

Institutional Protection Scheme

In March 2018, the group established a more cohesive cross-support mechanism under an IPS (under Article 113(7) of the EU Capital Requirements Regulation; CRR). The IPS entails the creation of an ex-ante recovery fund to address liquidity and solvency problems within the group members. The fund strengthens both AECR's existing cross-support mechanism to support members undergoing financial distress and BCE's role within the group, even though, on its own, the fund is insufficient to provide support to the entire group. The IPS members are supervised on an individual basis, but benefit from lower regulatory requirements, such as capital relief on intragroup lending, and lower contributions to the Deposit Guarantee Fund. However, the structure of the IPS is weaker than that of European peers due to the lack of capital and liquidity fungibility and consolidated supervision.

Strategy Focused on the Group

BCE has been consistent in executing its strategy, linked to the quality and efficiency of services offered to member banks, and the setting up of the IPS while maintaining reasonable earnings. The bank's strategy remains focused on business growth and efficiency, while preserving BCE's key role in the AECR group. BCE's main projects consist of provide high-quality services to the group, and most of them are oriented towards compliance and risk management, digitalisation and ESG strategies.

Risk Profile

Conservative Risk Appetite

BCE's activities are generally low risk, and the bank has well-developed risk-management systems to minimise its exposure to credit, market, liquidity and foreign-exchange risks. Non-bank lending accounts for a small part of the balance sheet, and often relates to clients operating with various cooperatives. The size and equity of the AECR banks limit their ability to extend large loans; consequently, BCE arranges loan syndications or assists its members by providing this service. The bank is exposed to the risk of losses from operational errors, reflecting its reliance on effective IT systems for processing. Operational errors have so far been very small.

BCE's exposure to market risk is largely structural given that trading activities are small. Exposure to structural balance-sheet mismatches (interest rate and liquidity) is minimised by the short-term nature of assets and liabilities, which are closely matched in terms of interest rates and maturities. The bank securities portfolio has reduced in 2023 but remains sizeable at 35% of total assets at end-2023, and largely valued at amortised cost (68%), which reduces volatility to regulatory capital. We expect the bank to maintain the securities portfolio at similar levels and with a lean towards Spanish sovereign debt over the medium term.

Financial Profile

Asset Quality

BCE's balance sheet is composed of its large securities portfolio (end-2023: 35% of total assets), cash (24%), interbank placements (12%), which mostly relates to AECR's members' balances placed at the ECB deposit facility, and the small loan book (10%). Securities mainly include Spanish sovereign debt (71% of total securities), which results in some concentration, and, to a lesser extent, debt from Italy, financial institutions and corporates. At end-2023, about 92% of BCE's counterparty exposures were rated investment-grade.

BCE's fairly small loan book mainly comprises loans to large corporates and SMEs. Impaired loans accounted for only 0.3% of gross loans, and were more than covered by loan loss reserves. We expect any asset quality pressures to be contained given BCE's low risk appetite for loans and the well-collateralised profile of its operations.

Operating Profit/Risk-Weighted Assets

Source: Fitch Ratings, Fitch Solutions, banks

CET1 Ratio

Source: Fitch Ratings, Fitch Solutions, banks

Earnings and Profitability

BCE's profitability has been fairly stable over the cycle, reflecting its role as an intermediary for AECR members, and the bank charging a fixed margin on the funding and liquidity channelled. Hence, BCE's ability to sustain profitability depends on the interest rate environment and on the business volumes from cooperatives. Higher business volumes, sound cost efficiency and reversal of loan impairment charges have kept the operating profit/RWAs ratio at adequate levels for the ratings in recent years.

BCE's operating profit/RWAs slightly improved to 3.3% in 2023 (3.1% in 2022), with operating income increasing by 7%. This compensated for the growth in operating expenses (6%), which was mainly due to inflationary pressures, as well as the hiring of additional staff in line with the strategic plan. NII increased by 10%, helped by higher business volumes as margins slightly narrowed on higher funding costs due to BCE's funding profile based on interbank funding. The bank's operating income was also supported by some trading gains and fee income. The cost/income ratio remained good at about 36% in 2023.

We expect profitability to slightly improve and benefit from higher business volumes from the group cooperative members in 2024 and 2025. This, combined with a good cost control, and should limit asset quality pressures.

Capitalisation and Leverage

BCE's robust capital ratios have satisfactory buffers above regulatory minimums, although its overall equity base is small. Capitalisation is supported by the bank's low risk weights as cash and securities represented 59% of total assets at end-2023. The bank's leverage ratio (end-2023: 7.3%) reflects better its capitalisation, which is also sound. The liquid nature of its own investments means BCE has some flexibility to deleverage its balance sheet quickly, if needed. Additionally, BCE can leverage on higher earnings retention and capital raising from its members to support capital. According to the AECR's statutes, all member banks are obliged to subscribe to BCE's capital increases.

Funding and Liquidity

In its role as the central treasurer for AECR member banks, BCE's main function is to provide the members with access to funding from the ECB and wholesale markets, and to manage their liquidity. BCE's funding position is fairly stable, based on deposits placed by AECR members, which accounted for 74% of total non-equity funding at end-2023.

Liquidity is comfortable given the bank's business model, and largely placed in highly liquid assets. As the central treasurer for the AECR member credit cooperatives, BCE's main functions are to provide them with access to funding from the ECB and the wholesale markets, and to manage their liquidity.

Additional Notes on Charts

The forecasts in the charts in this section reflect Fitch's forward view on the bank's core financial metrics per Fitch's Bank Rating Criteria. They are based on a combination of Fitch's macro-economic forecasts, outlook at the sector level and company-specific considerations. As a result, Fitch's forecasts may materially differ from the guidance provided by the rated entity to the market.

To the extent Fitch is aware of material non-public information with respect to future events such as planned recapitalisations or merger and acquisition activity, Fitch will not reflect these non-public future events in its published forecasts. However, where relevant, such information is considered by Fitch as part of the rating process.

Black dashed lines represent boundaries for indicative quantitative ranges and implied scores for Fitch's core financial metrics for banks operating in the environments that Fitch scores in the 'bbb' category.

Peer average includes Cecabank, S.A. (VR: bbb), Gruppo Bancario Cooperativo Iccrea (bbb-), DZ BANK AG Deutsche Zentral-Genossenschaftsbank. Unless otherwise stated, financial year (FY) end is 31 December for all banks in this report.

The colours indicate the weighting of each KRD in the assessment.
■ Higher influence ■ Moderate influence ■ Lower influence

BCE's Government Support Rating (GSR) of 'no support' reflects our view that, although external extraordinary sovereign support is possible, it cannot be relied on. This is because senior creditors can no longer expect to receive full extraordinary support from the sovereign in the event that the bank becomes non-viable.

How to Read This Page
ESG relevance scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the ESG general issues and the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signaling the credit-relevance of the sector-specific issues to the issuer's overall credit rating. The Criteria Reference column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis. The vertical color bars are visualizations of the frequency of occurrence of the highest constituent relevance scores. They do not represent an aggregate of the relevance scores or aggregate ESG credit relevance.

The Credit-Relevant ESG Derivation table's far right column is a visualization of the frequency of occurrence of the highest ESG relevance scores across the combined E, S and G categories. The three columns to the left of ESG Relevance to Credit Rating summarize rating relevance and impact to credit from ESG issues. The box on the far left identifies any ESG Relevance Sub-factor issues that are drivers or potential drivers of the issuer's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the relevance score. All scores of '4' and '5' are assumed to result in a negative impact unless indicated with a '+' sign for positive impact. Scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI), the Sustainability Accounting Standards Board (SASB), and the World Bank.

Social (S) Relevance Scores

General Issues	S Score	Sector-Specific Issues	Reference	S Relevance
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Business Profile (incl. Management & governance); Risk Profile	5

Labor Relations & Practices	2	Impact of labor negotiations, including board/employee compensation and composition	Business Profile (incl. Management & governance)	3
Employee Wellbeing	1	n.a.	n.a.	2
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Business Profile (incl. Management & governance); Financial Profile	1

Governance (G) Relevance Scores

General Issues	G Score	Sector-Specific Issues	Reference	G Relevance	CREDIT-RELEVANT ESG SCALE
Management Strategy	3	Operational implementation of strategy	Business Profile (incl. Management & governance)	5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal/compliance risks; business continuity; key person risk; related party transactions	Business Profile (incl. Management & governance); Earnings & Profitability; Capitalisation & Leverage	4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Business Profile (incl. Management & governance)	3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Business Profile (incl. Management & governance)	2	Irrelevant to the entity rating but relevant to the sector.
				1	Irrelevant to the entity rating and irrelevant to the sector.

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation of the materiality or relevance of ESG factors in a rating decision. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

SOLICITATION & PARTICIPATION STATUS

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
